Spiytus Stawski

SPIRYTUS

Poland

Poland is one of Europe's major producers of fermented spirit. Rectified spirit for export, produced from grain, is rectified twice using the most up-to-date technology.

Polish rectified spirit is produced in a modern, completely automated rectification process, using high-quality raw materials and subjected to rigorous laboratory testing.

Polish rectified spirit is neutral and devoid of undesirable odors and fermentation residues.

Rectified Spirit is additionally purified through a special process. It is virtually pure ethyl alcohol - the perfect base for a mixed drink.

Available in Cases of 12 750ml Bottles

Alcohol by Volume: Red Label 96%

Alcohol by Volume: Blue Label 76%

Product Codes:
